

# SIMPSONVILLE FIRE HEADQUARTERS

City of Simpsonville, SC | 22,500 SF | Completed December 2024 | Cost \$8,400,000

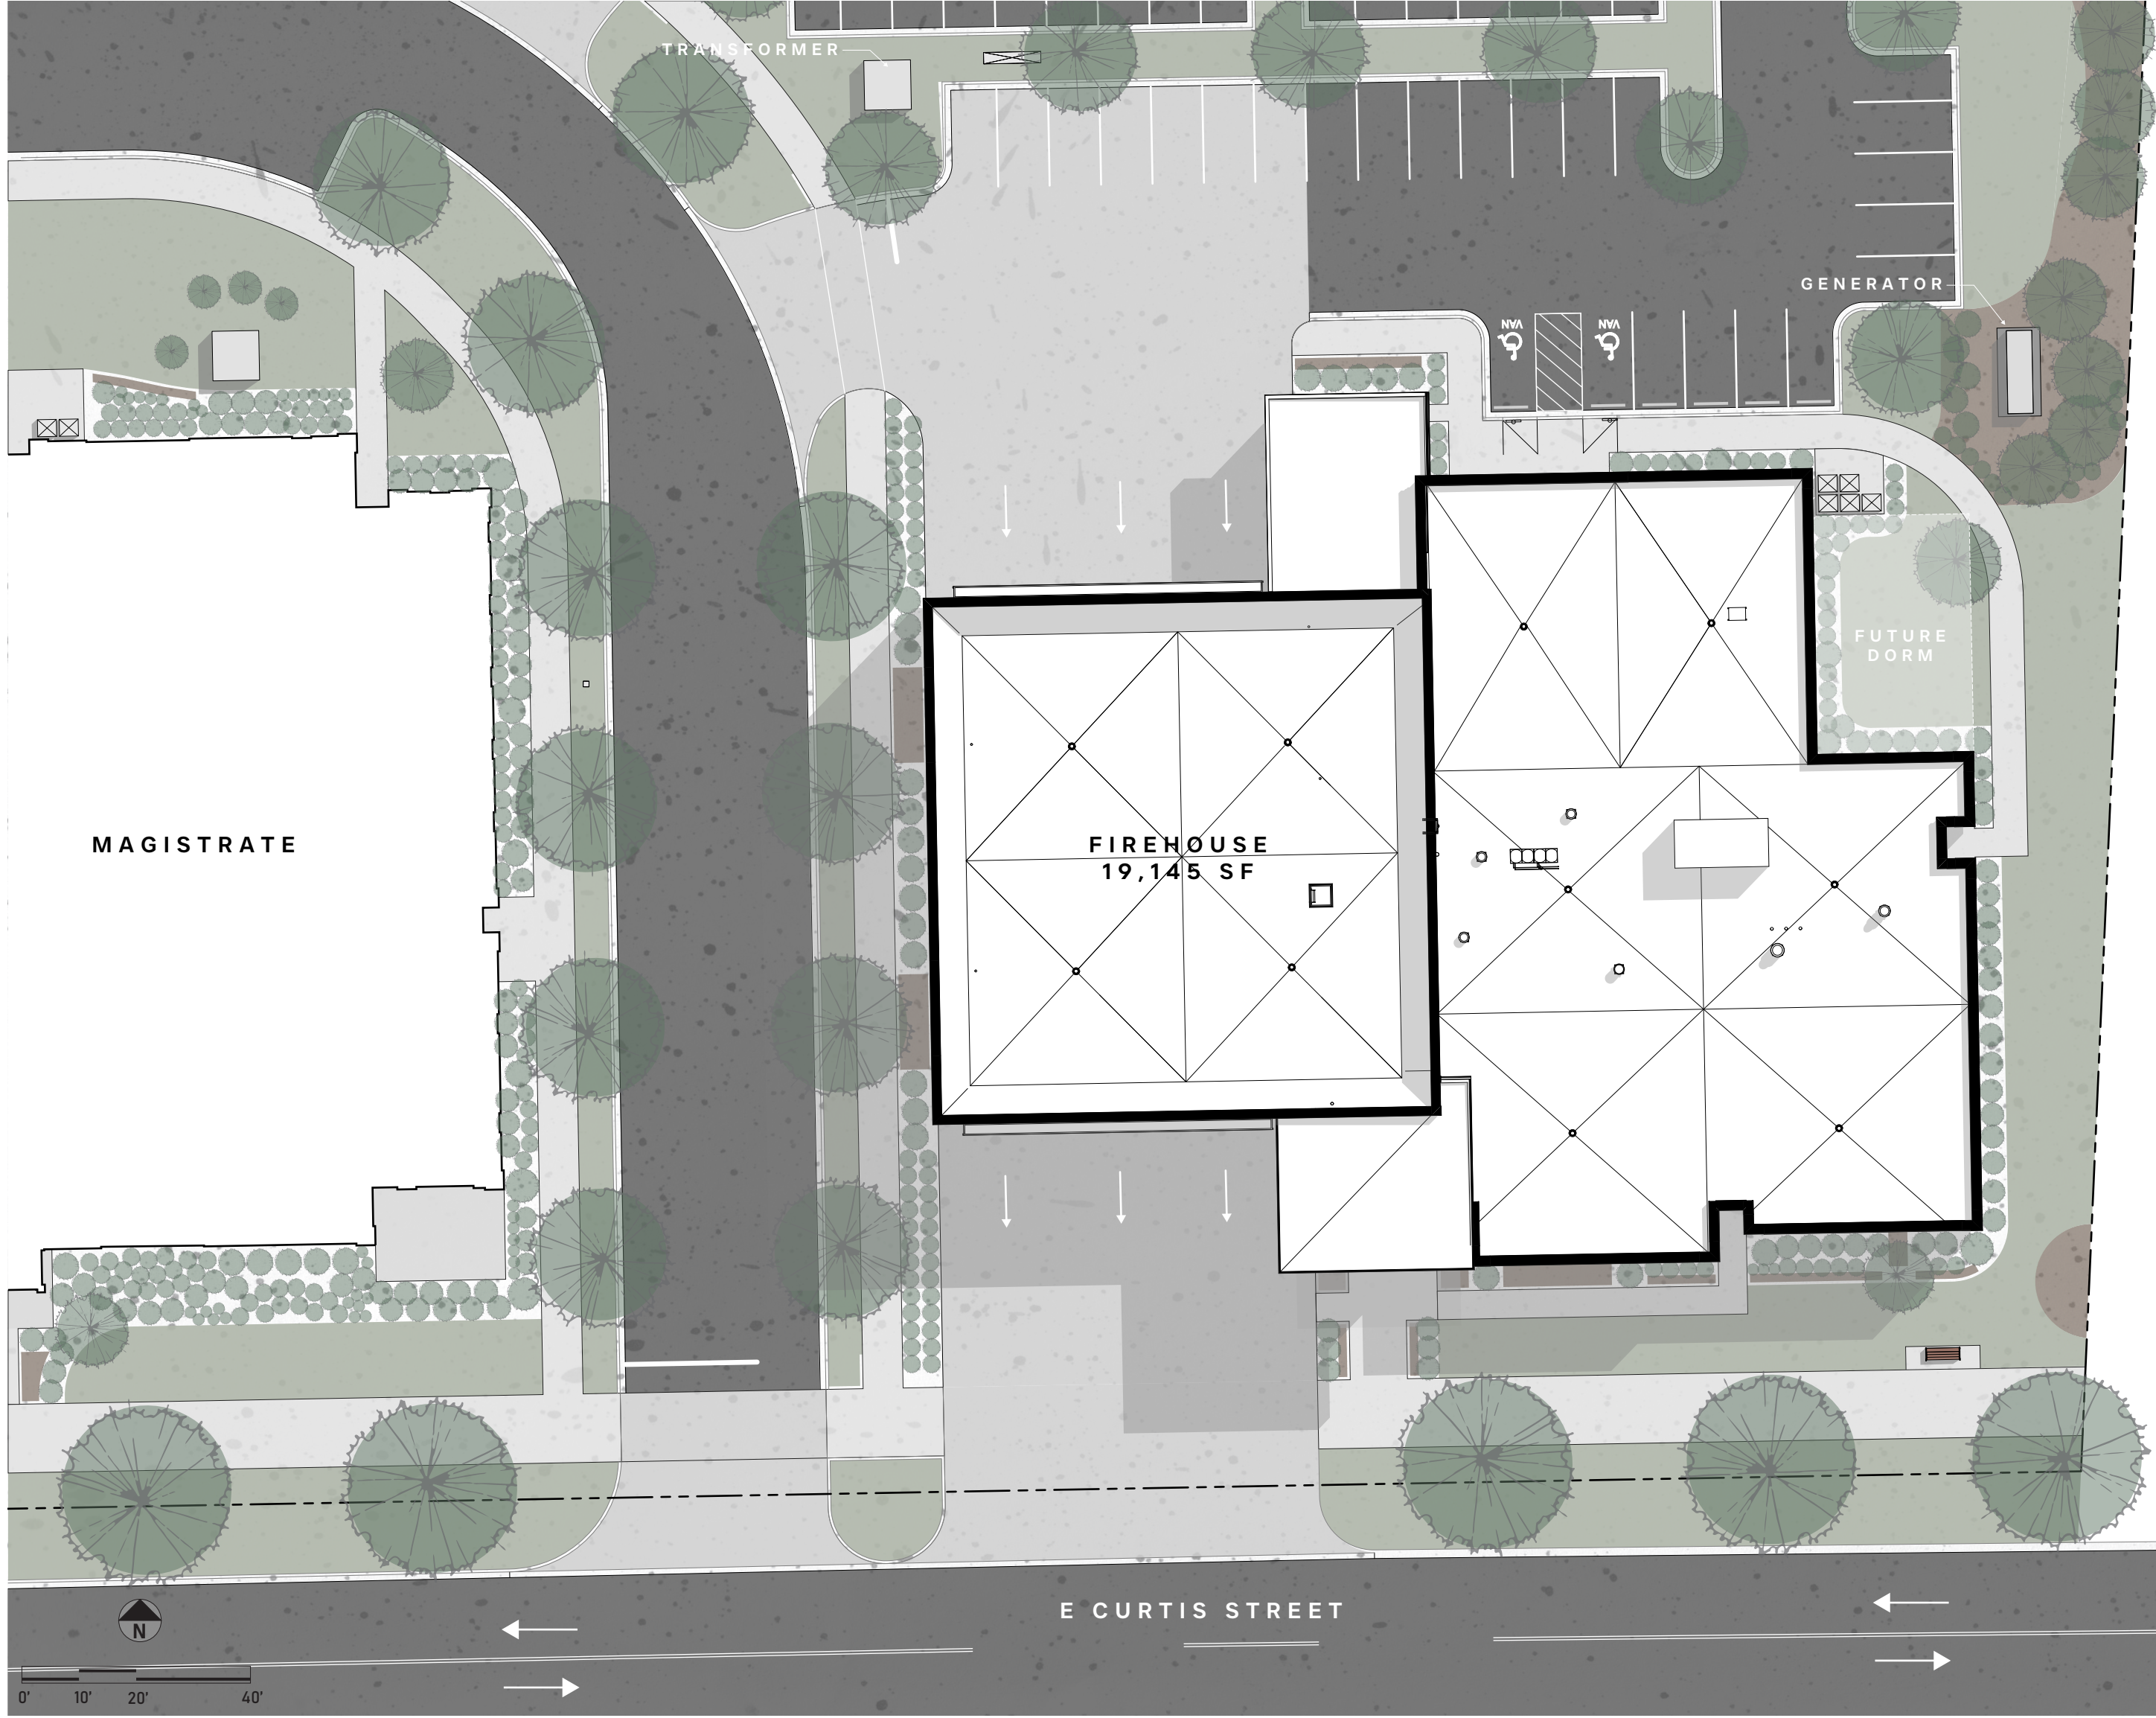

Located on the east end of the new Simpsonville Municipal Complex, the new Simpsonville Fire Headquarters was designed to support the operational demands and daily life of the City's first responders.

A signature design feature of the station is the large windows looking into the apparatus bays, allowing park visitors to see the fire trucks up close. This thoughtful element fosters a sense of openness and community engagement while showcasing the department's readiness and pride in service.

Inside, the station includes a welcoming lobby, dedicated training room, spacious day room and kitchen, bunk room, and a fully equipped fitness room, promoting wellness and preparedness.

First responders play a vital role in keeping our communities safe. Designing environments that support their physical needs, mental wellbeing, and operational efficiency is essential to the success of their mission and to the safety of those they serve. The Simpsonville Fire Headquarters reflects that commitment through every detail, offering a design that is distinct yet cohesive with the broader architectural character of the Simpsonville Municipal Campus and revitalized city park.
